

Ambient Lighting

GGI's Ambient Lighting solutions are designed to elevate the cabin interior experience. Our offering includes customizable feature lights and accent lights where the textures, finishes and colors can be tailored for your brand.

The passenger well-being is at the heart of our considerations, thus we design our Ambient Lighting solutions to enhance the flight experience. Comfort your most demanding passengers by creating a sense of home and harmony with our Ambient Lighting solutions.

Unique designs for every customer

Strong with more than 30 years of experience in silkscreen printing, we can customize the lamp shades to complement your interior design.

Our printed solutions are optimized for customization and our products have an outstanding uniform lighting.

Ambient Lighting solutions are certifiable to DO-160, FAR 25.853, Boeing and Airbus standards.

Product Features

Weight

550 g

Size (W, D, H in mm)

79.2 x 89.1 x 214.5

Nominal Voltage

20 to 28 VDC

Typical Current Draw

1.7mA +/- 0.5mA @ 28 VDC

Maximum Current Draw

3.5mA @ 28 VDC
